- it contains offensive language:
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.

During my early years my family Riini whanau resided adjacent to Te Hokowhiti Otū. I lived there 1955 - 1973 and left at the age of 23.

At the age of approx 10 years old I witnessed the dumping of materials from the Whakatane Board mills on the now proposed residential site. This dumping ~~site~~ area spanned from the access corner across to 50 metres within the private whanau driveway.

During the flood season (normal late to early years) this block would flood and the residue of this dumping would float to the top of the flooded water. As children we would play on this material and we named this shakōy island. Myself as well as most of my siblings and cousins waded through this material.

years later, on returning to my papakainga we were made aware of the true extent of contamination.

I have a daughter who had cancer at the age of 8 years old. She has ^{today} thankfully stabilised, but is unable to bear children.

I have every intention to return to the papakainga for whanau gatherings of our traditional cultural practices. It is for two reasons that I support the submission in opposition to development of residential zoning.

I am aware of the high levels of cancer within our whanau and associated medical problems. My opposition is made to make aware of the contamination I witnessed and is for the benefit of the wider community. I am not convinced adequate testing has been conducted, in particular the area I mentioned above.
